Linux Ubuntu OS client/user setup

Purpose:

This documentation is for setting up a base linux Ubuntu 22.0.2 LTS client. It will have an “admin” account and a “user” account

Scope:

This will be a guide for machine setups for employees that work (prefer to) in Linux. See the Windows 10 client install SOP for documentation on creating a Windows client.

Responsibilities:

Our IT department at Team KnonSense will be responsible for maintenance, updates, patches, etc.

Prerequisites:

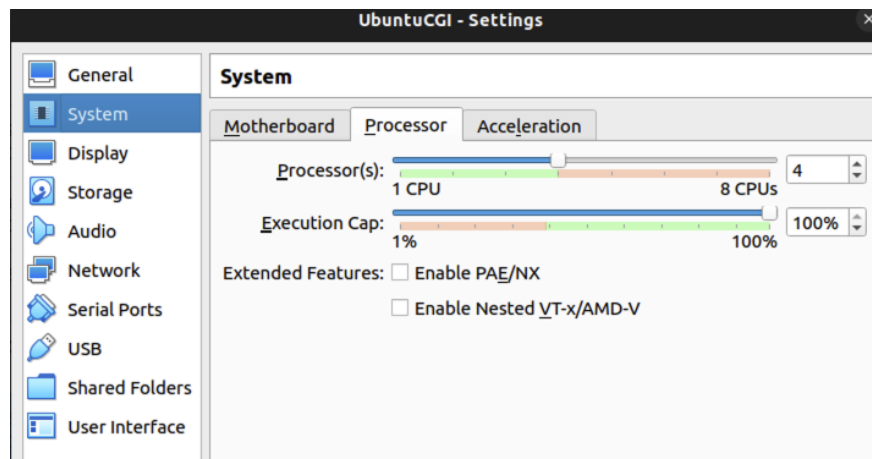

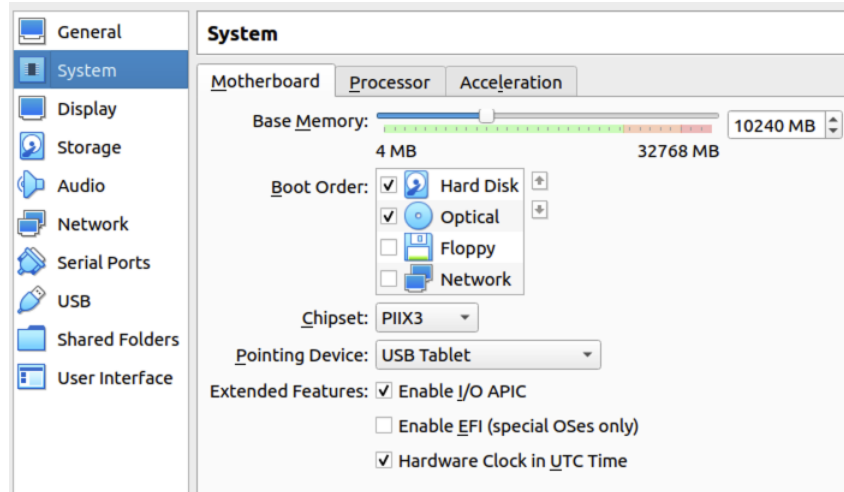

This SOP is to be followed when a new user client needs to be set up (a new employee for example).

Procedure:

(For development purposes create a virtual machine)

(The client will be providing new laptops at a later date for type 1 installs.)

Create a virtual machine with the Ubuntu 22.0.2 LTS ISO in Virtual Box.

Complete Installation of Ubuntu on system. Then make sure to create both accounts needed.

Systems Credentials:

- UbuntuClient:
 - admin / solarwinds123
 - CGI-UbuntuUser1 / solarwinds12
